**DETAILED ACTION**

1. Claims 1-21 are pending.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-12, drawn to a transgenic non-human mammal whose genome is heterozygous for a mutant Erk5 gene and cells thereof, classified in class 800, subclass 8.
  - II. Claims 13-15, drawn to a method of treating angiogenesis by administering an antibody to Erk5 protein, classified in class 424, subclass 184.1.
  - III. Claims 13-15, drawn to drawn to a method of treating angiogenesis by administering an oligonucleotides that prevents expression of Erk5 protein, classified in class 514, subclass 44.
  - IV. Claims 13-15, drawn to a method of treating angiogenesis by administering a small molecule inhibitor or antagonist of Erk5 protein, classified in class 514, subclass 1.
  - V. Claim 16-19, drawn to a method of treating angiogenesis by administering a chemical entity that increases expression of Erk5 protein, classified in class 514, subclass 1.
  - VI. Claims 20-21, drawn to a method of treating angiogenesis by administering a combination of compounds, classified in class 514, subclass 1.
3. Claims 13 and 14 link inventions of the groups II-IV. The restriction requirement between the linked inventions is subject to the non-allowance of the linking claim(s), claims 13 and 14. Upon the allowance of the linking claims, the restriction requirement as to the linked invention shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application.

Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims or the continuation or divisional application may be subject to provisional statutory and/or non-statutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 USC 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129,131-132 (CCPA 1971). See also MPEP 804.01.

4. Inventions of the groups I and II-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of group I is drawn to a transgenic animal whereas the inventions of groups II-VI are drawn to methods of treating angiogenesis. The methods of groups II-VI cannot be use to make the composition of group I. Alternatively, the methods of groups II-VI do not require the composition of group I for practicing the methods.

Inventions II-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to methods of treatment of angiogenesis using different compositions- antibody, oligonucleotide, small molecule, chemical activity and combination of compounds and these compositions have different chemical and physical structure and characteristics and the method steps of one group can not be used for practicing other group. Therefore, they will require separate searches and considerations.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their recognized divergent subject matter, and because each invention requires a

Art Unit: 1632

separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
